

# Vishal Pandey

Java Software Engineer

📍 Pune, India | 📞 +91 9575440764 | ✉ bitthal.pandey@gmail.com | [LinkedIn](#)

## EXPERIENCE

### Associate Software Engineer

TCS

Oct 2024 - Present

Pune, Maharashtra

#### Project: Vista Vehicle Integrated System — Java/Spring Full-Stack Application (Java Developer)

- Working as a Junior Developer on an enterprise automotive application using Java, Spring Boot, SQL, JavaScript, AngularJS, HTML and CSS.
- Developed and enhanced features supporting the vehicle ordering, tracking and handover lifecycle.
- Analyzed defects and requirements by reproducing issues, debugging application flow and performing root-cause analysis.
- Implemented changes across frontend, backend and database queries, including market-specific business validations and tagging rules.
- Worked with REST APIs and database-driven business logic; performed unit, sanity and validation testing before deployment.
- Used Git/GitLab, Maven, Jenkins and AutoWizard for source control, build, merge-request and deployment activities within Agile 2-week sprints.

#### Project: Customer Consent Platform — OneTrust (Java Developer)

- Worked on enterprise OneTrust Consent & Preference Management solutions involving Profiles, Collection Points, Purposes, Preferences, Groups, Attributes, and Data Elements.
- Performed functional, API, and performance testing for consent-related application workflows.
- **Developed** a custom Java desktop application to automate the conversion of complex JSON responses into readable, formatted HTML formats, significantly improving efficiency for testers reviewing API payloads.
- Reproduced defects, analyzed application behavior, and prepared comprehensive test scenarios during defect resolution.

## EDUCATION

### B. Tech in Electronics Engineering - CGPA: 8.4

Madhav Institute of Technology & Science

Jan 2020 - Jan 2024

Gwalior, Madhya Pradesh

### CBSE Higher Secondary - Percentage: 82

Rishi Galav Public School

Jan 2020 - Jan 2020

Gwalior, Madhya Pradesh

## PROJECTS

### OneTrust Document Automation

Java: Developing a Java-based solution to reduce repetitive manual document updates while preserving document structure and formatting; using Apache POI for Word processing.

### Word Document Comparison Tool

Java: Developed a tool to compare two Word documents and identify/highlight added, removed and changed content to reduce manual review effort.

### Recycle2Power website

- Built a full-stack e-commerce platform using HTML, CSS, JavaScript, Node.js, and MongoDB for selling products made from recycled batteries Recycle2Power website.
- Implemented a battery-based discount system to encourage recycling and enhance user engagement.

### Search & Sorting Algorithm Visualization Website

- Developed an interactive web application to visualize algorithms using HTML, CSS, and JavaScript.
- Created real-time animations for algorithms like Binary Search and Merge Sort to improve understanding.

### Power Bank (Using Recycled Batteries) - Electronics project

- Designed and built a power bank using recycled batteries from scratch.
- Integrated features like battery level indicator and charging status display.

## SKILLS

- **Languages:** Java, C++, JavaScript, SQL, HTML, CSS, AngularJS, Spring Boot, Spring, REST APIs, JDBC
- **Database:** SQL Enterprise; OneTrust
- **Tools:** Git, GitLab, Maven, Jenkins, AutoWizard, JUnit, Mockito, Postman, Apache JMeter
